

CANYONING RÍO CORRENTOSO

This route is located approximately 25 minutes from the center of Pucón.

We will start the tour taking the passengers and guides to the starting point, where we will all put on the necessary equipment. Then, we will have to walk along the ravine to find 3 natural waterfalls distant from each other of approximately 10-12 meters.

When we arrive at the first waterfall, we will have the technical security talk. The first person to descend will always be one of the guides and he will have the role of assisting the passengers who will make their descent individually using two ropes - one controlled by themselves and a lifeline controlled by the guide on the top of the waterfall.

Due to the geography of the place, this route combines trekking with rappel (descent by means of ropes), zipline and observation of different attractions, such as: variety of flora and fauna, waterfalls, caves, ravines, slides, among others. This is also why during the whole trip we will be taking photos that will be shared at the end of the tour.

After having descended the 3 waterfalls mentioned above, we will leave the canyon to enter a private field where the transfer will wait for us and a surprise snack depending on the season.

Finally, we will all return to the center of Pucón and leave the passengers at the agency located in Lincoyán 361.

Schedule: Every day (Departure 09:00 am - Return 14:00 pm)
(Departure 15:00 pm - Return 20:00 pm)

Minimum of pax: 4
